Coan Mill Stream

0.95 MILES

Delist / Use Removal Summary:

DELIST 2014 - E. coli - A34R-01-BAC / 00946 / VAP-A34R-01 (CFL 2002)

In the 2002 cycle, Coan Mill Stream was assessed not supporting of the Recreation Use goal based on a fecal coliform violation rate of 6/20 at Route 360 (1ACON000.96).

During the 2008 cycle, the impairment converted to E. coli with a violation rate of 3/10 at 1ACON000.96. The original TMDL due date of 2014.

The violation rate during the 2012 cycle was 8/22. The stream was considered nested within the Shellfish TMDL for the Coan River Watershed, which was approved by the EPA on 12/18/2003 and by the SWCB on 12/2/2004.

In the 2014 cycle, it was determined that this station is actually tidally influenced. The impairment is now a part of A34E-05-BAC; the enterococci exceedance rate was 12/24 during the 2014 cycle.

Class III, Section 1a, Special Standards: none

Delist / Use Removal Summary:

PARTIAL DELIST 2014 - Fecal Coliform - E26E-41-SF (CFL 2008)

Shellfishing Use Removed 2014 - Admin. Condemned - DSS Cond #032-109B, 12/10/2009

Bush Park Creek was included on the 1998 303(d) list as impaired of the Shellfish Consumption Use due to VDH condemnation 109, 4/27/1989. The TMDL for this area was completed and was approved by the EPA on 6/7/2006 and by the SWCB on 6/27/2007. However, during the 2008 cycle, the condemnation expanded into the Rappahannock River and Woods Creek. The TMDL for Woods Creek and the Rappahannock River was due in 2020. During the 2012 cycle, the condemnation shrank and split. Section A now matches the TMDL study area. The expansion is limited to Woods Creek (032-109BB, 12/10/2009); the Rappahannock River segment was partially delisted. During the 2014 cycle, VDH indicated that Woods Creek is an administrative closure; therefore, the use is considered removed and it will be delisted.

VAP-C01E_COC04A98 Cockrell Creek 0.3086 SQUARE MILES

Delist / Use Removal Summary:

PARTIAL DELIST 2014 - C01E-08-SF / 00951 / VAP-C01E-08 / Fed Id 36236 (CFL 1998)
Shellfishing Use Removed 2014 - Admin. Condemned - DSS Cond #012-002A, 9/22/2005

Cockrell Creek was listed as impaired of the Shellfish Consumption Use during the 1998 cycle due to VDH-DSS condemnation 2A, 9/14/1993. The area is currently addressed in condemnations 012-002A, 9/22/2005. The bacterial TMDL for Cockrell Creek was developed during the 2010 cycle and was approved by the EPA on 12/8/2008 and by the SWCB on 4/28/2009. However, it was subsequently determined that a portion of section A was considered an administrative closure by VDH; therefore the Shellfish Use is considered to be removed and the section was delisted. The impaired section remained as Category 4A.

The administrative portion expanded during the 2012 cycle and now fully incorporates 012-002A, 9/22/2005; however, it was mistakenly still designated as impaired. The segment will be delisted in the 2014 cycle and the use is considered removed.

VAP-C01E_DVN01A04 Davenport Creek 0.0193 SQUARE MILES

Delist / Use Removal Summary:

PARTIAL DELIST 2014 - Fecal Coliform - C01E-34-SF / 00954 / VAP-C01E-34 / Fed ID 35953 (CFL 2004)
Shellfishing Use Removed 2014 - Admin. Condemned - DSS Cond #017-188A, 5/15/2012

The Shellfish TMDL for Davenport Creek was completed as part of the Indian, Dymer, Tabbs, and Antipoison Creeks TMDL. The TMDL was approved by the EPA on 4/8/2009 and by the SWCB on 7/27/2009. Davenport Creek was classified as a Category 4A water.

However, during the 2014 cycle, VDH indicated that the condemnation is administrative. The Shellfish Use is considered removed and the impairment will be delisted.
